Legislative Fellows meet with Senator Dave Sokola at Legislative Hall.

*Employment data compiled from Academic Year 2021-2022.
Established in 1961 and named in 2018 for the University of Delaware’s most distinguished alumnus and the 46th President of the United States, the Joseph R. Biden, Jr. School of Public Policy and Administration prepares students with the knowledge and skills necessary to engage in research and public service activities to improve the quality of life in communities around the world. The Biden School's faculty, staff, students and alumni create and use interdisciplinary, nonpartisan research, and empirically-based analysis, to inform effective decision-making and policy and to improve leadership and administration. The Biden School partners with organizations from all sectors to discover and foster innovative and equitable solutions to the critical challenges of our time.

Biden School History

Originally one of the nation’s first university centers focused on the challenges of urban America, the Biden School is a nationally and internationally recognized leader in public affairs education with a rigorous, collaborative approach to research and public service. The school helps students fully realize their potential and develop the practical knowledge and skills needed to succeed through high-quality experiential and interdisciplinary learning opportunities.

Biden School faculty, staff and students work directly with the diverse communities they serve, learning from them as they apply knowledge and research to their challenges and constantly refine solutions to form a bridge between the community of ideas and the community of action. The Biden School community upholds the constructs of democracy and civil discourse—producing results and leaders that catalyze change. The school’s distinctly interdisciplinary and applied educational, research and community engagement programs all work to advance the public good.
